

PN edition: 004.0909CV

MANN-FILTER range of replaceable centrifuge rotors for Trucks & Buses.

Centrifuge filters separate harmful contaminants from lubricant by employing the 'G' forces of centrifugal action to cause deposits to collect against the inside wall of a rotor. Some types of rotor can be cleaned, while others are designed to be quickly and efficiently replaced.

Many CV's are equipped with OE centrifuge systems developed by **MANN+HUMMEL** a pioneer of this growing market.

The **MANN-FILTER** range of replaceable rotors includes many applications for Renault and DAF trucks & buses and includes the popular ZR 700 x for the 2007 Ford Transit 2.4 and 3.2 TDCi.

Remember!
Many rotors are replaced more often than the oil filter, so don't miss this opportunity to secure addition revenue.

Include a MANN-FILTER 'XR' rotor to your customers service kit.

Part Number	Make	Model
 ZR 700 x	Ford	Transit 2007
	Land Rover	Defender 90/110/130
		Discovery II
 ZR 902 x	Renault Bus (Irisbus/RVI)	Ares
		FR1
		Iliade
	Renault Trucks (RVI)	C-Series
		CBH-Series
		CCH-Series
		CLM-Series
		Magnum
		Major
		Manager
		Maxter
		Premium Distribution/Route
	R-Series	
 ZR 903 x	DAF Trucks	CF75
		85CF
		CF85
		95XF
		XF95
 ZR 904 x	Irisbus	Ares/Ares N
		Iliade H
	Renault Trucks (RVI)	Kerax
		Magnum
		Premium Distribution/Route
		Premium Lander
