

Product optimization: External stabilization for air filters

Hengst Filtration is constantly searching for an optimized, environmentally friendly design in order to offer our customers the best possible solution for the constantly changing market requirements. In a continuous improvement process, we also strive to optimize existing products or adapt them to changing customer and environmental requirements. The Hengst Flex Tape is a manufacturing technology for increasing performance through optimized pleat stabilization for air filters.

Expanded metal (old)

Flex Tape (new)

The improved dust holding capacity of the Hengst Flex Tape was developed in Germany and tested in the laboratory. The conversion of various air filters for commercial vehicles and agricultural and construction machinery will take place successively over the next few months.
